Subject: RE: Draft Slide Deck for GLEC

For slides 2-3:

- Not sure you need a table format aligned to the 2014-2016 Priorities. I'd just list in bullet form as a quick update.
- I'd leave out the process-oriented stuff like meetings (on the slide) but rather highlight the results/outcomes/importance of the meeting (i.e. Subcommittee review of gaps in knowledge – elaborating on this).
- For “Assessment of Subcommittee membership...” wasn't the important point of the message that not having the right people at the table or to influence the necessary work? Again I'd not write out the process-oriented stuff on a slide (you can talk to that if needed) but the important message you're trying to get across.
- For PRP row.. just say you developed the draft A9 chapter.. no need to talk about the rest as there's a whole session on Day 2 of GLEC re. PRP. No need to go into detail as people should have the complete PRP draft if that goes out in advance of GLEC.
- These slides are a quick update and sets you up for highlighting why you chose your Priorities. I didn't make changes to these slides directly as not sure you're held to this table format. I'd just use a few bullets.

Delete slides 3-4.. replace with something like the slide 5 I inserted which keeps to same language that was submitted. I have 4 Priorities for Action for your annex – if I have the wrong version let me know.

For slide 5.. definitely make the linkage to the “Contract” to your first Priorities for Action bullet on previous slide(s).

Subject: Draft Slide Deck for GLEC

Hi All!

Here's a draft slide deck for the June GLEC meeting. As we discussed, ***please send along your comments by noon next Tuesday (5/24/16)***. I will incorporate those and send along to Ash by COB next Tuesday.

Also, does anyone have a good photo for the opening slide. I was thinking it might be timely to replace the "global temp" background with a picture that communicates the high water levels right now. We've been fielding quite a few calls regarding coastal erosion these days. I think our coastal engineers are quite busy as a result. Is this happening on the Canadian side too? Maybe a picture of a bluff failure where property/life at risk? Just a thought....

Comments welcome and appreciated!

Best,

Heather
